„Time is Money“ – literally applied since 30 years

Who doesn't know the old saying „Time is Money“ With POLYdrill multiple spindle heads from SUHNER you can live up to this maxim and wisdom and make money the old fashion way for 30 years and counting.

In its catalog edition of the year 1982 SUHNER proudly introduced a new line of multiple spindle heads which combined modern design features with high drilling performance in a very compact product envelope size.

Over time, SUHNER has built thousands of multiple spindle heads and gains in know-how were continuously invested in improved technology. This basic philosophy has been kept up for years.

A substantial gain in productivity and output can be achieved through the application of standard simultaneous multi operation components at relatively low investment cost.

Over the years, the program range for POLYdrill multiple spindle heads has been consistently up-dated and expanded. Today, our offering includes adjustable multiple spindle heads for 2, 3 and 4 spindles in 6 different capacity classifications.

Picture 3: Hole pattern for adjustable heads with 2, 3 or 4 spindels

Including custom made, application specific fixed spacing heads with up to 144 spindels – an enormous increase in productivity.

Picture 4: POLYdrill-Multiple spindle head with 144 spindles at fixed spacings

In addition to multiple spindle heads, SUHNER offers a variety of different other POLYdrill components including angle heads for drilling, tapping and milling operations as well as back facing heads vor drilling and countersinking operations.
